

Glowing Aura

LED Faux Fur Cropped Vest

READ BEFORE YOU LIGHT UP

MODEL MJ-2409SC

Meet your vest

Soft white faux fur on the outside, a glow on the inside. Your Glowing Aura vest has LED light strips built into the lining, so the whole piece lights up from within.

Faux fur shell

Plush white faux fur in a cropped, sleeveless cut.

Full zip

Zips up the front for easy on and off.

Oversized hood

A big, dramatic hood for maximum aura.

Built-in LEDs

Light strips in the lining with rainbow and white modes.

What you'll need

- ☐ A 5V rechargeable battery pack (not included)
- ☐ A CR series coin cell for the remote (not included)
- ☐ The original charging cable that came with your vest

Light it up

Four steps from dark to glowing.

1**Power the vest**

Fit your 5V rechargeable battery pack into the battery compartment and connect it.

2**Power the remote**

Fit a CR series coin cell into the remote control.

3**Switch on**

Turn on the power switch on the vest.

4**Pick your glow**

Short press the button on the remote to cycle through the lighting modes, including rainbow and white.

**When the night's done**

Remove all batteries from the vest and remote whenever you're not wearing it, so nothing drains.

Stay safe

Please read everything before you power up or wear your vest.

5V only. Never connect to 12V. It will burn out the circuit.

Fire and heat

Keep away from open flames, heaters and other high-temperature sources.

Electrical

Never immerse the vest in water. Use only a 5V power supply and the original charging cable.

Batteries

Batteries aren't included. Use compatible 5V rechargeable batteries only, and never take them apart or short-circuit them.

Your skin

Stop wearing it straight away if you notice skin irritation or overheating.

General

Don't use it if it's damaged. For external wear only. Keep small parts away from children and pets.

Care and storage

Look after it and it'll keep glowing, festival after festival.

CLEANING

Turn the vest off first, then wipe gently with a soft, lint-free cloth.

LIGHT STRIPS

Don't sharply bend the LED light strips in the lining.

STORAGE

Keep it somewhere dry at room temperature, between 15°C and 35°C.

LONG BREAKS

Remove all batteries if you won't wear it for a while, to avoid power drain.

Quick reference

VEST POWER

5V rechargeable battery

ON AND OFF

Power switch on the vest

REMOTE POWER

CR series coin cell

CHANGE MODE

Short press the remote

Need a hand?
